

## London Elections 2022

Green walking routes encourage people to get outside and get active. Whether it's a park or local streets filled with trees, walking in high quality nature-rich places improves our health and happiness. However, access to green space is unequal.

We want to make it easier for everyone to enjoy walking in nature. We are calling on councils and councillors in London to:

### Improve Walk London routes

Ensure the Walk London network – the London Loop, Capital Ring and other routes – can be walked without the need for a book or a map by improving signage and accessibility.

### Create new green routes

Help deliver Ramblers' vision for a walking network that links green spaces and makes it easier for everyone to enjoy a walk in nature.

### Make streets better for walking

Improve walking infrastructure by creating greener streets and safer crossings, widening footways, keeping public toilets open, providing benches, minimising pavement obstructions, and reducing pavement parking.
