

## Local Elections 2022

Walking in nature improves our health and happiness, whether on countryside paths, in town centre parks or down tree-lined city streets. However, access to green space is unequal. We want to make it easier for everyone to enjoy walking in nature.

We're calling on councils and councillors to:

- Prioritise and improve the local path network.
- Create new green walking routes that connect people to nature.
- Support everyone who discovered the joys of walking during the pandemic.

Commit to creating green walking routes that connect people to nature from their doorsteps.

Commit to supporting programmes that help more people to get walking.
