

Shrewsbury Ramblers –Webmasters Report 2021

The majority of effort over the last year has been centred on keeping the Group Walks Event Manager (GWEM) up to date with the many ad hoc walks added to the programme. The administration of ad hoc walks is quite a burden but necessary to keep the programme published and encourage Ramblers to walk.

GWEM has to be updated to reflect the latest walks information or Ramblers public liability insurance would be invalidated.

The platform requires little upkeep as it sits on the Central Ramblers platform.

A concerted effort to improve the websites' visual appearance will be made in January.

Encouraging Ramblers to use the website as the go to source of the latest walk information is vital to ensure that the effort in web administration is justified.
