

Pembrokeshire Individual Challenge

What to do ...

Use this sheet to record your daily steps. Keep track of your progress by checking the map, colour in the path as you pass each destination.

Walking any number of steps a day will improve your health but if you can walk 10,000 steps you will make a real difference! 10,000 steps is about 5 miles, see if you can build up to this over your programme and if you are already doing this then aim even higher!

Top tips to increase your steps!

- 1) Walk up and down when on the phone or texting.
- 2) Brush and pace! Pack in as many steps as possible in the time it takes to brush your teeth.
- 3) When watching TV take 100 steps every time an advert break comes on.

Record Sheet

| Weeks | 1* | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 |
|--------------|----|---|---|---|---|---|---|---|---|----|----|----|
| Monday | | | | | | | | | | | | |
| Tuesday | | | | | | | | | | | | |
| Wednesday | | | | | | | | | | | | |
| Thursday | | | | | | | | | | | | |
| Friday | | | | | | | | | | | | |
| Saturday | | | | | | | | | | | | |
| Sunday | | | | | | | | | | | | |
| Total | | | | | | | | | | | | |

*this is your baseline week.
