## Information for Walk Leader

At the start of the walk, briefly inform attendees of the following:

- Introduce yourself and the backmarker and give details of the walk: the route, estimated finish time, refreshment stops and points of interest.
- Highlight your expectations of walkers and any places where particular care is needed. If people wish to leave by walking on ahead or finishing early, make it clear that they must let you know they are leaving and that they understand your responsibility as leader ends when they leave the main group and thus they are no longer insured.
- Non-members of the Ramblers must join after three walks.
